

“Reliable screw threads” is YAMAWA’s theme

Origin of corporate name, "YA" "MA" "WA"

Mr. Jokichi Watanabe, the founder of the company, decided to use shop name "YA" "MA" "WA", which he had been using in his family business instead of using his personal name. And he gave to his company the name "YA" "MA" "WA" by employing lucky words and the same connotation "YAMAWA" from ancient Japanese characters, MANYOGANA. The meaning of YAMAWA is "Greater prosperity, More united". In this word, he put a wish "as the company becomes prosperous, the harmony among employees becomes more precious".

90 years' experience in threading application

YAMAWA was founded in 1923. For more than 90 years, YAMAWA has been improving the quality of Taps and Dies in order to meet the customers' needs. Our chief goal is to provide our customers with "Reliable screw threads"

90% in house built of all the grinding machines

More than 90 % of the grinding machines are made by YAMAWA. This enables us to always maintain the highest accuracy of the grinding machines in order to continue to supply our customers in the world with the highest quality of taps. This leads to consistency of the taps' performance.

100% quality inspection

Taps produce thousands of internal screw threads. One defective tap could produce thousands of defective parts. In order to prevent this from happening, YAMAWA does 100% final inspection for each single piece as well as intermediate inspection after each grinding process.

All the products are manufactured in Yamawa's domestic factories to ensure a well controlled high quality.
